

First user experiences with DS PrimeTaper: Excellent workflow that shows promise for practices and patients

In combination with the new DS PrimeTaper implant system, three signature workflows can be implemented seamlessly. In their first field reports, beta testers emphasize the easy handling and the suitable options in challenging situations. Overall, according to the first users, the clearly structured workflows benefit both the practices and the patients —the treatment proceeds quickly and saves the patient at least one session thanks to digitally implementable steps.

Michael Norton, dentist with private practice in London, United Kingdom

“My patients want a long-term reliable and, above all, esthetically pleasing solution that allows them to chew and smile again without worry. Supported by digital technology, the DS PrimeTaper workflows offer a clearly structured way to achieve this, starting with esthetically satisfying temporaries. Finally, the seamless connection to Dentsply Sirona Atlantis patient-specific solutions enables superior esthetic and functional results in the final restoration. More to come soon.”

Dr. Dan Buttermann, dentist with private practice in Centennial, USA

“I see an increasing demand for implant focused treatment in my practice. When it comes to implants, I want the simplest, most efficient solution possible. The DS PrimeTaper provides the ideal workflow: quick planning, simplified drilling protocol, and perfectly fitting restorations. The time saved pays off for my practice and for my patients.”

Dr. Martin Wanendeya, dentist with private practice in London, United Kingdom

“To improve the predictability of any treatment, good diagnostic information and accuracy is essential. High quality Accurate CT scans, accurate intra oral scans, well-made surgical guides and well-fitting components all form part of this equation. We use DS Orthophos, Primescan and Siplant as they give us the accuracy needed to plan, place and restore single tooth to fill arch restorations with confidence to deliver long term results.”

Dr. Mischa Krebs, oral surgeon with private practice in Alzey, Germany

About Dentsply Sirona:

Dentsply Sirona is the world's largest manufacturer of professional dental products and technologies, with over a century of innovation and service to the dental industry and patients worldwide. Dentsply Sirona develops, manufactures, and markets a comprehensive solutions offering including dental and oral health products as well as other consumable medical devices under a strong portfolio of world class brands. As The Dental Solutions Company™, Dentsply Sirona's products provide innovative, high-quality and effective solutions to advance patient care and deliver better, safer and faster dental care. Dentsply Sirona's global headquarters is located in York, Pennsylvania, and the international headquarters is based in Salzburg, Austria. The company's shares are listed in the United States on NASDAQ under the symbol XRAY.

Visit www.dentsplysirona.com for more information about Dentsply Sirona and its products.

“As an oral surgeon and specialist in implantology, I am struck by the differences to the systems we have been using up to now. The length indication by a laser band marking is clearly visible intraoperatively and provides orientation. Thanks to sharp and evenly working drills, in combination with the new drilling protocol and the new implant geometry the insertion of the implant can be completed very quickly—the time saved is clearly noticeable.”
