

Efficient prophylactic workflow with high-quality products from a single source

More than ever before, patients are motivated to maintain a beautiful smile by keeping their teeth healthy and well cared for. That's why products for prophylaxis and professional tooth cleaning are integral to dental practices. This makes it all the more important for every practice to be ideally equipped. Dentsply Sirona offers everything required for effective treatment – from the treatment center with professional prophylaxis equipment through to polishing pastes.

Bensheim/Salzburg, March 21, 2017. In any center offering comprehensive caries and periodontal care treatments – in addition to ensuring the well-being of the patient – an ideal workflow for practitioners must be guaranteed. Thanks to the wide range of products offered by Dentsply Sirona, it is possible to support the individual treatment steps and merge these into a workflow to create an end-to-end solution: everything from a single source, from diagnosis through to final treatment.

Diagnosis always forms the starting point for evaluating oral health, and if there is any uncertainty, diagnostics should also include an x-ray image. Dentsply Sirona offers the entire spectrum of digital imaging systems: the complete intraoral range – comprising the Heliodont Plus X-ray tube assembly, the Xios Scan imaging plate scanner and the Xios XG Supreme sensors – as well as the 2D/3D hybrid systems Orthophos SL. All X-ray data can be displayed on the monitor of the treatment center within seconds for diagnosis and communication using Sidexis 4 X-ray software.

No limits to personal preferences

With the flexible positioning of the dentist/assistant element and the tray system together with customizable feature packages, Intego Pro, the treatment center specially equipped for prophylaxis, ensures everything is in the ideal place. This, in turn, means fatigue-free working even when performing treatments on your own. A wide variety of special prophylactic instruments can be selected from the various equipment packages. One being the Sirocam: It creates new opportunities for patient communication – if the patient can see more, the better he understands the need for treatment. In addition, customers can integrate an ultrasonic handpiece for various applications to their treatment center. The options include a SiroSonic or, especially for prophylaxis treatments, the Cavitron Ultrasonic Scaler. Dentsply Sirona offers two "Specialists" for polishing: The contra-angle handpiece T1 Line Prophy enables effective polishing of teeth and material surfaces in connection with brushes and caps. It can be integrated into treatment centers. An alternative is the Nupro Freedom Cordless Prophy System handpiece. It fits easily in the hand and does

As The Dental Solutions Company, Dentsply Sirona's products provide innovative, high-quality and effective solutions to advance patient care and deliver better, safer and faster dentistry. Dentsply Sirona's global headquarters is located in York, Pennsylvania, and the international headquarters is based in Salzburg, Austria. The company's shares are listed in the United States on NASDAQ under the symbol XRAY. Visit www.dentsplysirona.com for more information about Dentsply Sirona and its products.

not require use of a foot pedal. It has a long battery life and is ideal for applying Nupro polishing paste. For thorough germ reduction in gingival pockets, Dentsply Sirona offers the SiroLaser Advance and SiroLaser Blue diode lasers which help to improve the results of periodontal treatment in the long term.

Feel-good factors for patients

As well as practitioners, patients also benefit from intelligent workflows: During treatment, the ergonomic design and pleasant upholstery of the Intego Pro guarantee maximum comfort when seated. Even senior patients and children feel comfortable at all times – they can access the treatment center very easily due to the unique chair lift. The carefully coordinated procedures significantly reduce the time required for treatment, give a sense of security and create the feeling that everything fits together perfectly.

Due to various certification and registration periods, not all products are immediately available in all countries.
